

REG-EAG Limited Strategic Review

Released: 19/12/2007

RNS Number:3071K

EAG Limited

19 December 2007

EAG Limited

("EAG" or "the Company")

Strategic Review

Following the Company's trading statement earlier today, the board of EAG has resolved to terminate the Company's acquisition program with immediate effect. Management will focus on consolidating the existing business and maximizing value for shareholders. As part of this, the board has initiated a full strategic review of the business, including the possibility of an outright sale. The board will update shareholders in due course.

Note to editors:

EAG is a leading international materials science company, providing inorganic and organic materials characterisation testing as well as electronic failure analysis services. The Group offers its customers highly sophisticated testing services broadly used in developing new processes or materials, transferring those processes to production, developing and qualifying new production tools, performing failure analysis, solving process problems in manufacturing, and providing third-party product validation. EAG has an international network of laboratories and serves more than 2,500 customers worldwide, primarily the

research and development departments of companies developing products where properties of materials are critical to product performance. The Group provides its testing services to a broad range of end-user market segments, including semiconductor capital equipment, electronic materials, specialty metals and alloys, semiconductor fabrication, biomedical, pharmaceutical, and aerospace and defence. Incorporated in Jersey and headquartered in Ireland, EAG was admitted to AIM in June 2007. Further information can be found at www.eaglabs.com
